Education

New York University — Sep 2025 – May 2027
Master of Science in Computer Science — *New York, NY*

RNS Institute of Technology — Dec 2021 – May 2025
Bachelor of Engineering in Computer Science and Engineering — *Bengaluru, India*
GPA: 3.95/4.0 | **Department Rank:** 3/200

Coursework: Data Structures, Analysis of Algorithms, Operating Systems, Computer Networks, Database Management Systems, Software Engineering, System Design, Big Data, Machine Learning, Computer Vision, Blockchain, Human-Computer Interaction

Professional Experience

HashedIn by Deloitte — Feb 2025 – Jul 2025
Software Development Engineer (SDE Intern Feb–Apr 2025, converted to full-time) — *Bengaluru, India*

- Built an **AI-powered evaluation assistant** adopted cross-functionally, that auto-reviewed candidate code and summarized projects, cutting per-candidate review time from **∼60–90 min to ∼15 min** across **210+ interns** weekly.
- Integrated **LLM APIs** into the assessment pipeline (∼20 calls/assessment, **∼4,000 requests/week**), hardening system prompts against **prompt injection** and answer leakage when questions were re-asked.
- **Pipelined** next-question generation while candidates answered the current one, eliminating **20–30 s waits** between questions.
- Developed **25+ Spring Boot REST endpoints** for core evaluation workflows with **RBAC + JWT** session isolation; containerized services with **Docker** and set up **CI/CD** pipelines.

MindPath Innovations — Jul 2024 – Dec 2024
Software Engineer Intern — *Bengaluru, India*

- Developed a **full-stack LMS** end-to-end, from a React frontend and Django backend, serving **3,800+ students** and **300 faculty** across 3 institutions, with role-based **REST APIs** for attendance, grades, and assessments.
- Built a centralized, login-protected **reporting platform** replacing per-record spreadsheet edits (∼2–3 min each) for attendance, tests, and exams - delivering customer value by saving **50+ staff** an estimated **∼4 hrs/week** each.

Projects

Relay: Webhook Delivery Service | *Python, FastAPI, asyncio, PostgreSQL, Docker* — Live GitHub

- Built a webhook delivery service with **PostgreSQL as a concurrent job queue** (SKIP LOCKED claiming, lease-based crash recovery, fencing), reaching **99.9% delivery with 0 duplicates** at 30% receiver failure.
- Implemented **HMAC-SHA256 signing** with replay protection, **exponential backoff with jitter**, and a **dead-letter queue** with replay, plus a live dashboard visualizing retries in real time.
- Found **head-of-line blocking** through load testing and redesigned the asyncio worker for continuous in-flight delivery, cutting p50 latency **92s → 12s (7.8×)**; **41 tests** in CI.

Job Application Tracker | *TypeScript, React, Node.js, Express, PostgreSQL, Vercel* — Live GitHub

- Implemented **session-based authentication** from scratch (scrypt password hashing, hashed session tokens in HttpOnly cookies, CSRF protection, rate limiting) with **per-user data isolation** in every query.
- Built a multi-user, **typed REST API** with **Zod** schemas shared between React and Express as a single validation contract.
- Deployed serverless on Vercel + Neon Postgres with transactional migrations; **254 tests (87.5% line coverage)** in GitHub Actions CI and **136 ms p95** end-to-end API latency.

Leadership & Teaching

New York University — Feb 2026 – Present
CS Team Lead, PASS Tutoring — *New York, NY*

- Lead a team of **15+ peer tutors** supporting **50+ CS students** each semester, while tutoring students weekly.
- Hire new tutors by conducting **technical interviews** and grading **entrance exams**; set quality benchmarks for the program.

Technical Skills

Languages: Java, Python, C++, C, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks & Databases: Spring Boot, FastAPI, Node.js, Express, Django, React, REST APIs, PostgreSQL, MySQL, MongoDB
Cloud & DevOps: AWS, GCP (Cloud infrastructure), Docker, CI/CD (GitHub Actions), Git, Vercel, Agile, SDLC
AI & Tools: LLM API Integration, Prompt Engineering, PyTorch, AI-Assisted Development (Claude Code)
Practices: Code Review, Testing, Debugging, System Design, Problem-Solving, Analytical Thinking, Communication Skills
